This Report has been prepared, in accordance with Para 2.4.1 of Public Finance Circular No. 409, for the Minister of Education to submit to the Parliament.

2013 August

Monitoring and Performance Review Branch
Planning and Performance Review Division
Ministry of Education
Isurupaya
Message of the Secretary to the Ministry of Education,

I am very much pleased to forward the Annual Performance Report of the Ministry of Education which includes the information on the progress achieved through the overall education development programmes implemented in order to accomplish the qualitative and quantitative development in the education during the year 2012.

Securing further the policies of education and direction of qualitative development with expeditious and meaningful access as a country which had been able to acquire many victories through the Policy of Free Education have become the prioritized target of the Ministry of Education. The development of Mahindodaya 1000 secondary schools and 5000 child friendly primary schools attached there to was the most prioritized development programme implemented in the year 2012 under the Mahinda Chinthana way forward medium term development strategy. Arrangements have been made to invest domestic funds as well as foreign funds in a priority basis for this programme which had been executed with the broad objective of producing global citizens by providing equal and quality educational opportunities for every child with definite target.

Due recruitment of teachers, principals, managers in the field of education and officers who have the control over the administration and employment of them as and when required and implement of their professional skills have been identified as the most prioritized requirement and many significant steps have been taken in that regard during this year.

Making arrangements to strengthen schools with the intention of producing good citizens and to strengthen Divisional and Zonal officers of education as the closest educational institutions to schools and as institutions which are normally responsible for management and development of education had been a programme highly emphasized in the previous year.

Our intention is to accomplish the forward vision of making Sri Lanka a knowledge hub by uplifting the overall quality of the school education through a serious of similar programmes.

Appendix 3 : Key Posts and Officials as at 2012.12.31
1. Overview of the Ministry of Education

**Vision**

To reach excellence in global society through competent citizens who share the Sri Lankan identity

**Mission**

Develop competent citizens keeping with the global trends through innovative and modern approaches to education leading to efficiency, equity and high quality performance ensuring stakeholder satisfaction

1.1. The Responsibilities of the Ministry of Education

Development of education is a priority among the programmes implemented by the Government for a sustainable development under the Mahinda Chintana Forward Vision to make Sri Lanka the Wonder of Asia.

The Ministry of Education entrust the onerous responsibility of providing its contribution for the gigantic role of transforming Sri Lanka as the knowledge hub in Asia.

The Ministry of Education has adopted all steps to implement many programmes with a novel developmental access in order to meet all challenges energetically for the provision of equal education to every child without any irregularities for making the concept, “the best is for children” a reality.

The responsibility of directing all parties required for a targeted development while maintaining a proper co-ordination with Provincial Councils for the accomplishment of the objectives of national education is carried out by the Ministry of Education without failure.
1.2 The functions of the Ministry of Education

- Interpretation and use of National Policy of Education positioning in the wider objectives of education providing recommendations and feedbacks to National Education Commission regarding the formulation and modernization of National Policies of Education.

- Planning, implementation, regulation, progress review and appraisal of educational activities in conformity with National Objectives and Policies.

- Maintaining bi-lateral and multilateral international relationships and functioning in co-ordination with regional and international organizations.

- Determination of standards of General Education and making arrangements required for the maintenance of such standards and developing creative activities of schools and the other educational institutions.

- Development, implementation and appraisal of curricula related to general education, teacher education, special education and Pirivena education.

- Conducting research by identifying the research fields for the development of education and using such results in the progress of education.

- Maintaining and reviewing methods of appraisals appropriate for the National level certificate examinations, subject examinations and aptitude tests.

- Development of human resources required for a strong and qualitative education process.

- Management and appraisal of performances in teacher education institutions and National schools which are under the purview of the Ministry of Education.

- Provision of instructions to provincial authorities of education regarding the management and implementation of programmes and co-ordination and review the same.

- Implementation and supervision of projects which are assisted by foreign aids.

- Determination of specifications and standards for educational aids, buildings and equipment related to education and development of plans.

- Provision of text books, uniforms and services and goods that are to be supplied in national level.

- Estimation and allocation of provision for all the capital expenditure and recurrent expenditure of the Ministry of Education and institutions under the purview of the Ministry and implementation of a formal financial management system.

- Administration of service minutes of all the services under the field of education and maintaining a proper internal control among institutions which are under the purview of the Ministry.

---

1.3 Institutions affiliated to the Ministry of Education

- Provincial Departments of Education
- Department of Educational Publications
- Department of Examinations, Sri Lanka
- National Institute of Education
- National Library and Documentation Services Board
- National Book Development Council, Sri Lanka
- Sri Lanka National Commission for UNESCO
The specific objectives of the National Education Strategic Plan for the period of 2012 - 2016 is to prepare the school system of Sri Lanka as the foundation of human capital required for a future knowledge centered economy and for a society.

Therefore, this strategic plan has been introduced as the “Transformation of school system as the foundation of human capital for knowledge centred economy”.

“Overall, the ESDFP(2012-2016) will improve the quality of the education system by diversifying the secondary education curriculum to enable students to acquire cognitive, affective and psychomotor skills and values demanded by society and the future knowledge-based economy. To establish the basis for the secondary stage of education, grades 1 to 5, constituting the primary stage of education will lay the foundation for the physical, mental, emotional and social development of the child since it is a formative period in the life of the child. It was in this background, the following sector strategies were identified.” (Executive summary, The National Strategic Plan for the General Education Sector, Ministry of Education 2012)

The National Strategic Plan has been organized under three policy themes and one foundation theme.

**Theme 1: - Increase equitable access to primary and secondary education**

- Ensuring the continuation of free education policies
- Extension of compulsory age limit of education from 6 to 14 years up to 6 to 16 years
Minimization of the inequalities regarding the quality of primary and secondary education and opportunities of accessibility.

Minimization of the numbers of students not attending schools but in the age limit of schooling.

Expansion of non-formal educational programmes.

Strengthening of formal and non-formal educational programmes.

Ensuring the rights of education of students who are differently abled.

Strengthening of Pirivena education

Ensuring a protected and a secured environment for education within the school.

Strengthening of school health and nutritional programmes

Upgrading of syllabuses to suit the present policies of education and cultural identity.

Implementation of counselling services in school level.

Programmes for re-admitting school dropouts who live in unfavorable areas into the school system and implement gap filling education interventions.

Establishment of networks of schools having 1000 efficient secondary schools and feeder primary schools to ensure equal access and participation in the primary and secondary education.

Theme 2 :- Improve the quality of primary and secondary education

Diversification and development of fair and balanced curricula based on competencies.

Providing similar and equal secondary educational facilities for science education

Development of education in areas affected due to conflicts prevailed in the Northern and Eastern Provinces.

Provision of basic requirements and high quality educational facilities to every school as per national norms.

Ensuring the right of getting education in the mother language and creating bilingual educational opportunities.

Provision of sports facilities to every student

Increasing the percentage of students qualified to study for the G.C.E. A/L and expansion of opportunities of learning the G.C.E. A/L science and commerce subject streams.

Taking special measures to improve subject achievement levels of students.

Streamlining of teacher placement for all the subjects including Science, Mathematics and English and provision of modern technological facilities for the learning teaching process of these subjects.

Upliftment of professionalism and respect of teachers.

Implementation of student guidance and counselling programmes.

Promotion of social integration and religious harmony through schools.

Incorporating value education and human rights into school curriculum.

Modernization of examinations, appraisal and evaluation system of education.

Upliftment of the quality of the contents which have been included in school text books.

Theme 3 :- Strengthen governance and service delivery of education

Strong implementation of school based planning and the programme of school improvement.

Strengthening child friendly school approach in every primary school.

Assignment of powers of taking management and financial decisions by schools themselves.

Upliftment of professionalism of principals and education officers

Establishment of a training academy for school principals

Strengthening of zonal offices of education as educational management units and divisional offices of education as education development supporting units.

The Foundation Theme: Education Sector Development Rolling Plan

Resourcing, financing and planning in a manner that equality and efficiency are ensured economically

Strengthening educational planning, budgeting, research and regulation and evaluating cultures within the general education field.

Strengthening educational management information system

Establishment of a national evaluation system in Sri Lanka and using disclosed information in educational planning.

Crosscutting Activity

Implementation of result based monitoring and evaluation strongly.

Overall, this mid term programme is being implemented targeting economical development and regional development in Sri Lanka. It will contribute to fill social economical gaps through the creation of a community with knowledge and skills regionally. Likely, the long term objective of this programme is to assist eradication of poverty in Sri Lanka and to assist in the confirmation of the standing of Sri Lanka as a middle income country.
3. Strategies to ensure equal access to and participation in primary and secondary education

3.1 National Programme for Re-designing of Mahindodaya 1000 Secondary Schools and Development of 5000 Feeder Primary Schools with Child Friendly Approach

Implementation of the national programme for re-designing of 1000 secondary schools and 5000 primary schools as the prioritized educational development process of the mid-term developmental programme for the period of 2012 - 2016 of the Ministry of Education is a grand victory achieved in the year 2012.

A broad foundation has been laid by this programme in order to achieve practical solutions for issues existing in opportunities of education regionally and many different short comings such as unequal distribution of resources, under performed levels of students, urbanization of student population and student health and nutritional issues.

This programme is implemented with the broad expectation of providing students equal educational opportunities with required levels of quality for producing the human capital base required for the future knowledge hub in Sri Lanka.

3.1.1 Goals and objectives of the programme

- Establishment of the right of getting equal access to education for all children through minimization of irregularities existing in regional and institutional level.
- Increasing the utilization of educational resources by paying special attention to schools which have encountered the threat of closing down situated in remote and disadvantageous areas and thereby increasing economical and social benefits.
- Establishment of opportunities for quality education with pleasant learning experiences through gaining administration, management and pedagogical practices to a higher status.
- Establishment and expansion of access to learning all the languages and subject streams.
- Production of Sri Lankan citizens who are fulfilled with skills to suit the national and international labor markets.
- Production of a generation of students with gentle skills such as academic skills as well as communication skills, leadership skills, commercial aptitude.
- Laying the foundation for the production of a healthy generation of children, with positive attitudes and good human qualities.
- Implementation of special programmes and projects which refurbish and enhance gentle skills.
- Development of schools as productive institutions with strong management and with proper relationships among communities.

3.1.2 Major components of the programme

1. Qualitative development priorities in education
   - Programme of uplifting students’ performance in the G.C.E. (O/L) and G.C.E. (A/L) Examinations.
   - Commencement of the G.C.E.(A/L) science education stream at least in three schools located in a Divisional Secretariat Division.
   - Development of methodologies of teaching Mathematics, Information Technology, English and other foreign languages and provision of facilities in this regard.
   - Encouraging students to participate in sports, athletics and co-curricular activities.
   - Direction of children who leave school after completing the national examination for skill development and vocational training by providing a basic competency certificate.

2. Supply and development of human, physical, infrastructure and financial resources
   - Provision of modern facilities to learn Mathematics, Information Technology, English and Foreign languages through Mahindodaya Technological Laboratories.
   - Provision of trained teachers as and when required and teacher training.

3. The priority of empowering good governance and provision of services.
   - Appointment of competent and creative principals and provision of a higher management training.
   - Provision of financial and management powers to schools as and when appropriate.

3.1.3 Selection of secondary and primary schools for development under the programme

Networks of schools comprised of a foremost secondary schools in the division and feeder primary schools situated closer to that secondary schools were selected through a mapping exercise and under a determinant based methodology. The selection of these schools was conducted in a manner that problems are minimized with the intermediation of provincial level and with the consent of all the parties concerned.

Accordingly, 632 secondary schools giving priority to the years 2012-2013 and 2000 primary feeder schools connected to those were selected for development.
3.1.4 The progress in the development of 1000 secondary schools.

i Construction of Mahindodaya Technological Laboratories

Two Mahindodaya Laboratories were constructed in Ratmalana Kotalawalapura College and Pitipana Mahinda Rajapaksha College and they were offered to students and arrangements were made according to that model to construct Mahindodaya Laboratories in another 409 schools during the year 2012.

iii Appointment of Principals

It is expected to create a pool of competent principals with management skills for these secondary schools. An initial 5-day training was provided to 69 principals as the first step.

iv Provision of financial grants for school development and maintenance

A financial provision of Rs. 5 lakhs was granted to a school for school based development activities by the Education Sector Development Frame Work and Programme (ESDFP/TSEP) for 405 schools as the initial stage and of the programme of developing 1000 secondary schools.

v Re-designing of 100 of Secondary Schools under the ADB funded Education for Knowledge Society Project (EKSP) under the re-designing of 1000 schools

A school based financial grant of Rs. 1 lakh was provided for essential maintenance, repairs and physical resources development in 1400 secondary schools in the island. The specialty here is the formulation of a satisfying process and a background to the school in order to carry out the empowering processes of decision making, formulation of plans and implementation of such plans in the investment of such financial resources.

Under the investment in the project, 50 schools had been developed by investing about Rs. 2000 million with 3 fully equipped laboratories for the G.C.E. (A/L) science subject stream.

3.1.5 Development of 5000 primary schools through child friendly approach.

Development of 5000 feeder primary schools networked with 1000 secondary schools was carried out in parallel with the development of 1000 secondary schools in 2012 as a priority programme of the Ministry of Education. Development of these schools is done in order to establish a network of 5000 primary schools which provide very pleasant and protective child friendly environment for learning considering the importance of primary education for the development of the child.

The contribution of the Ministry of Economic Development was obtained for the development of 1680 schools as child friendly schools in the year 2012 and accordingly a financial grant of Rs. 5 lakhs for every primary school was provided to school level for the development of overall school plant including by improving sanitary facilities and drinking water facilities and beautification of school premises.

Under the Child Friendly School Programme, a model programme in relation to 25 zones selected in collaboration with Provincial Councils is being implemented with the participation of the Presidential Secretariat. Arrangements have been made to obtain multi-sectoral contribution in Ministerial level for the implementation of this programme.

Child friendly active learning environment
3.2 Implementation of Compulsory Education Regulations

Arrangements have been made to formulate the legal framework required for the extension of the age limit of compulsory education from 5-14 years which exist at present upto 5-16 years. Accordingly, it is expected that all the children would remain in school at least up to grade 11 and thereby the risk of becoming child labourers would be prevented.

3.3 Inclusive Education

As an approach of reaching the objectives of “Education for All”, action has been taken to strengthen and promote inclusive education within the school system that provides learning methods which are appropriate for all the children. Arrangements were made to develop e-teaching package and to conduct pilot programmes on it at 13 selected teacher centres. It is expected to analyze and to forward recommendations regarding the progress obtained by Sri Lanka through preparation of Education for All - end decade assessment report(2005-2010).

3.4 Student Welfare Programmes

- **Provision of text books free of charge**
  The government has distributed 437 types of text books free of charge related to the curriculum of grade 1 to grade 11 approximately to 41 lakhs of students who study in all the government schools, government dependent private schools and in Pirivenas.

- **Provision of uniform materials free of charge**
  65 lakhs of packets of uniform materials were distributed among 40 lakhs of students of all the government schools, government dependent private schools and Pirivenas.

- **Provision of bursaries**
  Bursaries are offered to children of low income families who had shown higher performance level in the Grade 5 Scholarship Examination until they complete school education. The overall number of students getting bursaries as indicated above is approximately 85,000.

- **Provision of midday meal and a glass of milk**
  Steps have been taken to provide midday meal for about 10 lakhs of students in 7625 schools island wide and a glass of milk to 3 lakhs of students in 1446 schools.

3.5 Development of National Schools

National school network comprised of 342 schools throughout the country are directly administered by the Ministry of Education. Development of infrastructure facilities, physical resources and human resources of National schools are executed by the Ministry of Education.

Performance in the year 2012
- Implementation of programmes for increasing results of G.C.E. (O/L) and (A/L).
- Appreciation of children who had obtained highest results.
Programme for developing small schools

Under this programme, small schools with less than 50 students are identified with a priority basis and a developmental procedure based on specific objectives had been launched and the patronage of Presidential Secretariat had been offered in this regard. 1590 of such schools would be developed under this programme. A strategic approach had been executed for obtaining the contribution of the Ministry of Education, Provincial Ministries of Education, Ministry of Economic Development, Telecommunication Regulatory Commission of Sri Lanka, Sri Lanka Information Technology Agency and Private institutions for the implementation of this programme.

The following developmental approaches are being implemented in these schools.

- Fulfillment of required sanitary facilities.
- Fulfillment of drinking water requirements.
- Provision of infrastructure facilities required by a primary school.
- Provision of novel primary technological instruments including computer technological facilities.
- Fulfillment of requirement of teachers.

Development of plantation schools

Development of plantation schools had become a priority programme among the programmes implemented by the Government with the intention of uplifting the educational standards of children living in unfavorable environments. The following programmes were implemented in the year 2012 with the purpose of developing the quality of primary and secondary education in plantation schools and improving the knowledge gained from the subjects of Science, Mathematics and English.

- Conduct of 2 workshop in the Central Province for preparing multilevel learning equipment for primary education.

5.1.2 Teacher Education and Teacher Training

The National Colleges of Education, Teachers Colleges and Teacher Centres are the centres for teacher education and teacher training in the country.

National Colleges of Education (NCOE)

There are 18 NCOEs and 17 out of them produce Teaching Diploma holders relevant to various subjects as per the needs of the system, by giving them a complete pre-service training. The NCOE of Peradeniya is specially reserved for the English language training of the officers and the teachers of English.

Teachers Colleges

There are 9 Teachers Colleges for implementation of in-service training programmes as well as training of untrained teachers.

Teachers Centres

Continuous professional development programmes of the teachers in the system are conducted by 104 Teachers Centres established island wide.

Annual Performance

- Providing training opportunities for 360 untrained graduates.
- Recruit 8100 student teachers to National Colleges of Education.
- Providing a ‘set of electronic learning on child friendly school access to student teachers.
- Conducting National Teaching Diploma awarding ceremony after 5 years.
- Make aware the relevant zones and preparation of handbook and circular for the implementation of School Based Teacher Development programmes in 23 selected zones for year 2013.
- Admission of 1488 untrained teachers of government
Aims and Objectives

- Professional development of all the officers.
- Strengthen the zonal education office as an administrative unit and divisional education office as a learning development unit.
- Developing the leadership and management abilities of the principals.

Annual Performance

- Direct the staff officers of the Ministry for local and foreign training programmes.
- Conduct professional development programmes for 265 officers in the services of development assistant, management assistant and parallel services.
- Direct 80 officers to Tamil language course.
- Conduct a leadership development programme for 69 principals under the programme to develop 1000 Secondary Schools.
- Conduct a training programme for 106 in the office assistants service in the Ministry of Education.
- Attach 2500 student teachers who undergone the teacher training in 2010/2011 to schools and conduct final examination.

Recruitment to Sri Lanka Principals’ Service

- Taken action to fill 1010 out of 1759 vacancies in the class III.
- Completion of interviews to recruit 2767 individuals on super numeric basis to class 2 - II.
- Taken steps to promote 3429 to class 2 - I on seniority and merit basis.
- Invitation of applications to fill 395 vacancies on limited, seniority and merit basis.
- Invitation of applications to fill 105 posts of National School Principals.
- Sent Sri Lanka Principals’ Service Minute to the Salaries and Cadre Commission with the recommendations from the provinces.

Recruitment to Sri Lanka Teacher Educators’ Service

- Invitation of applications to fill 272 vacancies in class III.
- Sending the gazette notification relevant to the promotion of 241 to class 2 - II and 14 to class I to Public Service Commission for approval.
- Invitation of applications relevant to promotions of 40 individuals to class 2 - II.
- Sending the revised Sri Lanka Teacher Educators ‘Service Minute for the approval of the Public Service Commission.

Recruitments to Sri Lanka Education Administrative Service

- Send to Public Service Commission for approval of the recruitment of 147 out of 185 vacancies in the class III on limited competitive examinations.
- Provide 108 appointments to 122 vacancies in class III on the seniority and merit.
- Recruitment of 42 for existing 103 vacancies in class III from open competitive examinations.
- Promoting officers to 08 vacancies in the class I existed as at 01.01.2011.
- Sent for approval of the Public Service Commission in order to promote to 24 vacancies exist in class I at 01.01.2012.
- Sending the revised Sri Lanka Education Administrative Service Minute for the approval of the Public Service Commission.
- Conduct the training programme officers of class III recruited from the open competitive examination.

Miscellaneous Training Programmes

5.5.1 Aims and Objectives

- Professional development of all the officers.
- Strengthen the zonal education office as an administrative unit and divisional education office as a learning development unit.
- Developing the leadership and management abilities of the principals.

5.5.2 Annual Performance

- Direct the staff officers of the Ministry for local and foreign training programmes.
6.1 Aims and Objectives

- Provision of furniture and learning equipment to the National schools
- Distribution of special instruments obtained as foreign donations to all schools in the country
- Provision of equipment to Pirivena and Non formal education centres
- Make Isurupaya premises more pleasant, convenient and efficient to the employees and clients.
- Strengthening learning teaching process by improving infrastructure in the schools
- Develop primary schools as child friendly schools joined with the Ministry of Economic Development.
- Improve small schools those been threatened to closure joining with Presidential Secretariat.

7. Strengthening the Provision of Productive Service Supply and Evaluation of Performance

7.1 Implementation of National Education Policies and Coordination with Provincial Councils

7.1.1 New National Education Policy

A national education policy framework has been completed drafting with a view to cover economic, social and global novelties ensuring the way forward of the national education and transferring the higher values.

7.1.2 Coordination of education development programmes and strengthening of progress review process.

Considering the qualitative development of education is a never ending goal, steps have been taken to conduct progress review meetings with a new approach to monitor education programmes implemented at every level continuously and formally in order to ensure the qualitative development.

- Monthly internal progress review meetings
- Education development committee meeting conducted by monthly with the provincial officers.
- Monthly meeting conducted with Hon. Provincial Ministers of Education chaired by Hon. Minister of Education.
- National school principals’ meeting.
- Zonal education directors’ meeting

7.1.3 Implementation of teacher transfer policy

- Taking steps to transfer 1500 national school teachers working in the same school more than 20 years.

- Taking views of all parties along with Hon. Provincial Ministers of Education for the preparation of the National Teachers’ Transfer Policy enabling the teacher balance among national schools and provincial schools.

7.1.4 Mahindodaya education development month - October 2012

The month of October 2012 was declared as the month of Mahindodaya development month and a 31-day special program was implemented at school, zonal, provincial and national level to increase the performance within a new development approach and to solve the prevailing education issues soon.

7.1.5 Empowering the school for school based development

One of the major new policies of the Ministry of Education is empowering the school to take decisions on school planning, financing and procurement by school itself and strengthening the accountability and service providing of the school. The financial circular and the instructions manual have been prepared for this purpose.

Steps were taken to provide school based learning promotion grant as an initial step to fulfill the basic needs of selected school under the programme to develop 1000 secondary schools.

7.1.6 School based recruitment of teachers

Graduate teachers have been recruited for 1000 secondary schools according to school based recruitment process. It is compulsory to work in the same school where the said teachers are recruited for a precise time. In accordance with this mechanism, teacher shortages in rural schools will be reduced.
7.2 Partnerships with International Organizations and Private Sector Organizations for Improving the Quality of Education

7.2.1 South Asian Regional Centre for Teacher Education

South Asian Regional Centre for Teacher Education was declared open by HE the President Mahinda Rajapakse on the 9th October 2012 at National Institute of Education premises at Meepe. It will be a foundation for development of a high quality teaching force in the region through developing policies related to teacher training and empowering the research in teacher education in collaboration with UNESCO and other partner organizations.

Inauguration ceremony was graced by the presence of Ministers of Education and representatives of the countries in the region namely Afghanistan, Bangladesh, Pakistan, Maldives, India, Nepal. The officers in the education sphere and organizations like UNESCO also participated.

7.2.2 Nanasa Education Television Programme

A Memorandum of Understanding has been signed between Ministry of Education, National Institute of Education and Dialog Axiata PLC to launch Nanasa education television programme as a platform to provide education for the children in rural and marginalized schools which are open experiencing teacher shortages in Science, Math, First language and English. Under this programme, 900 schools have already been provided with television sets.

7.2.3 Web Patashala programme

According to the Memorandum of Understanding signed between Sri Lanka State Trading Corporation, Etisalat Lanka PLC and Ministry of Education actions have been taken to provide schools computers, internet facilities and educational software designed on school curriculum.

7.2.4 Provision of computer facilities

Homagama Pitipana Mahinda Rajapaksha Vidyalaya is provided with 50 computers according to the Memorandum of Understanding signed between Gwangju Metropolitan Office of Education of Korea, Ministry of Science and Technology of Korea and Ministry of Education of Sri Lanka.

7.2.5 Receiving Pianos and Green boards as a donation

The Government of Korea has donated 3000 digital pianos to the Ministry of Education for the distribution to the Sri Lankan schools. In addition, 30,000 green boards were received as a private donation of a Korean individual. The value of these donations is estimated as Rs.1000 M.

7.2.6 Software Competition for Innovative teachers and students - Microsoft Corporation

This software competition is conducted and awards are presented annually under the co-operation of Microsoft Company with a view to polish innovative ICT competencies of teachers and students.

7.2.7 Intel Co-operation Programme

Sri Lankan Science and Engineering fair is conducted by Intel Company in coordination with National Science Foundation and Sri Lanka Engineering Institute for making school students participated in international competitions by encouraging them to create innovations. Intel has offered its contribution to have access for learning and designing resources for the students and teachers through the website www.school.lk.

7.3 New development approaches to improve the service delivery of the Ministry of Education

7.3.1 National Operations Room (NOR)

A national operations room was launched in the Ministry with the aim of taking distinct decisions to fulfill the educational requirements of all stakeholders and to use suitable information and communication methods for the assurance of effective, efficient and timely implementation of those decisions.

The NOR is implemented on following 5 objectives.

- Updating the basic and major information relevant to the fields of general education and ensuring the coordination for expanded usage
- To use information from mass media as a source and to enhance the ability of using of those information to accelerate solving problems in the field
- Obtaining current information through modern technical devices and create an approach that directs towards taking better decisions
7.4 Performance Evaluation

7.4.1 National assessments of achievement of students

Actions have been taken to implement national assessment of achievement of grade 8 students in 2012 in collaboration with NEREC institute of University of Colombo.

7.4.2 School and education institution assessment process

- External evaluation of 51 national schools.
- Feed back programmes in 05 national schools.
- Standards ,criteria and indicators were developed for National Colleges of Education and teacher education institutes and external evaluation was done in one NCOE.
- Preparation of a handbook for training of trainers on school external evaluation.
- A checklist was prepared to evaluate the quality of zonal education offices and 02 zonal offices were evaluated to improve the checklist.

7.4.3 Improving the processes of education research

- Steps were taken to improve research activities in provinces in collaboration with Department of research and development of National Institute of Education
- Dissemination of findings of research conducted using data of 13 schools on the impact of 'One Laptop per Child' programme which had been implementing since 2009.

7.3.2 Productivity Development Programme

In 2012, a productivity operational unit was established in the Ministry of Education. A productivity promotion committee consists of 30 officers representing all five divisions of the ministry has been established in this unit. The objective of this programme is to promote productivity in all branches of the Ministry with the aim of making the Ministry of Education excellent in providing service to the public.

7.3.3 e-Pension Project

Implementation of e-pension project in collaboration with Pensions’ Department with the objective of paying gratuity to the officers on date of retirement.

7.4.4 Improving the school data base

- School database was updated by the data of annual school census 2011
- Annual school census of year 2012 was conducted.
- Completion of teacher component in data entering into the new system software of EMIS with the co-operation of University of Moratuwa.
- Updating of GIS for schools according to the structural changes associated with 1000 school development programme.
- Launching of education data bulletin of 2011.

- Making the base of report writing wide and productive which confirms the development of education
- Widening the ability to reach major information sources of the Ministry of Education for foreign delegations through modern techniques

Access to NOR for the public is facilitated through media, telephone, email, fax and letters and the short code for direct dialing is 1988.
HE the President opens South Asian Teacher Training Institute .......

Launching Web-Patashala programme...

Awarding teaching appointments by HE the President...

Distributing equipment to the schools for Nenasa Distance learning programme...
Financial provisions of the Ministry of Education are allocated under expenditure heads of two major programmes namely Operational programme and Development programme.

Recurrent expenditure is borne with respect to the projects under 9 major sectors and Rs. 27,213 million had been allocated as recurrent expenditure for the year 2012. Rs. 11,095 million out of the said financing had been allocated for secondary education.

Capital expenditure of the Ministry of Education is implemented under 8 projects under the above two major programmes. Total capital allocation of the year 2012 was Rs. 6,886 million.

All foreign aids are considered as capital expenditure and it was approximately Rs. 3,925 million in 2012.

ADB, World Bank, UNICEF, AusAid, UNESCO, KOICA and USAid are major international agencies among those providing foreign aids for general education sector. The ADB made an investment of Rs. 2480 million in year 2012 through Education for Knowledge Society Project (EKSP). The World Bank has made an investment of Rs. 335 million in year 2012 through Transformation of School Education towards a Knowledge Society Project (TESP) under the Education Sector Development Framework.

Providing UNICEF funds for supply of water and sanitation facilities to small schools, KOICA and USAID funds for renovation of schools in Northern and Eastern provinces can be specially indicated among the foreign aids investments for year 2012.
8.5 Education for Knowledge Society Project (EKSP) - ADB Funded

**Vision**
Improved quality, relevance, effectiveness and equity of access to secondary and tertiary education which will lead to increased employability of educated youth.

### 8.5.1. Aims & Objectives

- To ensure opportunities for quality secondary education for all children through the development of secondary schools in Divisional Secretarial Divisions selected on the basis of poverty indicator.
- To strengthen the Provincial Information and Communication Technology Resource Centres with the objectives of improving the quality of ICT education and widen the ICT usage.
- To empower the school so that essential maintenance and repairs can be undertaken at school level.
- To create an environment for the schools to plan and implement education development activities at the school level through providing funds to the schools on the basis of performance, with the objective of ensuring the qualitative development of education compared with massive investment for physical development in secondary schools.
- To ensure efficient and productive learning environment in secondary schools.
- To widen competencies of both teachers and students so that ICT approach can be used as a learning teaching tool for education.
- To provide ‘Sisudiriya’ scholarships as a support to the bright students from low income families studying in grade 10-13 in disadvantaged environments.
- To provide financial support to school leavers to build up their future by broadening their vocational, social and leadership skills.
- To make the learning-teaching experience enjoyable by providing educational software to schools.

### 8.5.2 Annual Performance

- The development of first 100 schools under the 1000 school development programme is undertaken by the EKSP. Already 32 schools have been developed and handed over to the students and development of another 28 schools have been completed.
- Under the programme for development of Provincial Information and Communication Technology Resources Centres (PICTECs), Uva Provincial Centre has been completed and construction of other 8 centres were commenced.
- School Development and Maintenance Grant was released for 1400 secondary schools.
- Under the Special Development Financial Grant for 104 secondary schools under the 1000 secondary schools programme, the amount provided for each school in 2011 was doubled in 2012 based on their performance.
- Supply of computers and accessories, furniture and science equipment for the schools coming under secondary school development programme, was completed.
- Training scholarships have been awarded to 5422 teachers to obtain International Computer Driving License / Computer Assisted Learning.
- Training scholarships have been awarded to 4750 teachers to obtain International Pedagogical ICT (IPICT) License.
- Sisudiriya scholarships have been awarded to 30000 bright students studying in grades 10-13 from low income families.
- Scholarships were awarded to 7000 school leavers under the Accelerated Scholarship Programme for Skill Development (ASAP).
- Scholarships were awarded to 1045 school leavers to follow training courses on tourism sector employments (TSTS) and to 3317 school leavers to follow short term vocational training courses.
- Computers, accessories, furniture and equipment were provided to Computer Learning Centres in 2069 Type 2 schools.
The World Bank invests US$ 100 Million through TSEP under the Education Sector Development Framework and Programme (ESDFP) (2012-2016).

The development objective of the Transforming the School Education System as the Foundation of a Knowledge Hub Project (TSEP) for Sri Lanka is to enhance access to, and quality of, primary and secondary education to provide a foundation for the knowledge-based economic and social development of the country.

TSEP is implemented under the three key policy themes of ESDFP: Promoting access to primary and secondary education; Improving the quality of education and Strengthening governance and delivery of education services.

Performance-based monitoring and evaluation framework consists of following indicators has been introduced to monitor the project.

- Key performance indicators
- Intermediate outcome indicators
- Process/output indicators

Disbursement Linked Indicators (DLI) and their targets have been identified and releasing of World Bank funds for the following programmes are based on the achievements of the targets of the DLIs.

- Education Sector Development Plan
- School Based Teacher Development Framework
- Bilingual Education - Content and Language Integrated Learning (CLIL)
- Programme for School Improvement
- Strengthening of zonal and divisional offices for education

Financial investments are made to implement following strategies to ensure achieving the related long term and intermediate outcomes.

- Implement compulsory education regulations for the children of age 5-16 years and accordingly increase participation rates, identify out of school children and get them admitted to the schools.
- Quantitative and qualitative development of primary education
- Improve learning environment of the primary and secondary schools which come under the programme for development of 1000 schools for the network of feeder primary schools
- Strengthen the non-formal and special education programmes
- School health and nutrition programme
- Student guidance and counselling programme
- Revision of curriculum and qualitative development of the contents and teaching of Science, Math, English and ICT
- Implement teacher development programmes and introduce school based teacher development programmes as a new form of teacher development.
- Promote peace and social cohesion
- Strengthen quality assurance process of schools and educational institutes
- Strengthen school management process
- Improve leadership and management skills of school principals
- Disseminate the findings of national assessments on students learning achievements and include strategies in the education development plans to implement the recommendations
8.7 UNICEF Assisted Programmes

- Development of Primary Education
- Preparation and distribution of Guidelines for Child Friendly Schools
- Provision of water and sanitary facilities for remote schools in Central, Uva, Eastern, Western and Southern Provinces under the WASH programme
- Training of Literacy Instructors

8.7.1 Aims and Objectives

- To provide facilities to the project schools in order to enhance education level of the students
- To develop professional competencies of the principals and teachers

8.7.2 Annual Performance

- 50% of partially completed buildings in project schools were completed.
- 30 sets of western band equipments were distributed to the project schools.
- Training programmes for the principals and teachers were implemented.
- Expenditure in the year 2012: Rs. 47.7 million

8.7.2.1 Annual Performance

- 50% of partially completed buildings in project schools were completed.
- 80 photocopiers, 16 duplo machines, 100 filing cabinets, 1713 units of student furniture were provided to the project schools.

8.7.3 UNICEF Assisted Programmes

- Monitoring of Education for All (EFA) Goals and preparation of end decade assessment report on EFA
- Training of officers on the concepts and practices related to Monitoring and Evaluation and advanced statistics.

8.7.4 KOICA (Korean) Assisted Programmes

- Provision of Rs.200million for construction and provision of equipment for 11 schools in the Eastern Province.
- Rs. 500 million was granted for the construction and development of classrooms, activity rooms, quarters for teachers of 13 schools in the Killinochchi District.

8.7.5 New Model Primary Schools Development Project (Local Funds)

Vision

To reduce the competition for popular urban schools by providing facilities and developing the schools around these with a low student population; to reduce inequality among schools and to minimize the number of school dropouts.

It is a visible trend that the number of schools less than 50 students as well as more than 2500 students are gradually increasing for the past couple of years. This trend has raised several issues. Closure of small school as well as increase of the number of students resulting inability to maintain and administration of large schools are some of the major issues. Major social changes occurred in the transport and economy sectors caused this change, but the thousand secondary school development programme is one of the specific steps taken to avoid this situation to a different approach in the education sector.

Table 9.2.4.: No. of schools with G.C.E.(A/L) Science stream and No. of G.C.E.(A/L) Science students - 2011
9.3 Access and Participation

9.3.1 Survival of students in the system

The entrance of children to primary education in Sri Lanka is at a higher rate such as 98.3 percent, is a powerful factor that certifies the approach to education is at a higher rate. 98% of the children entering the primary education as such stay till grade 05. If staying till grade 9 it is a rate of 94% of females and 90% of males. Also the rate of females and males staying till grade 10 declines to 90% and 85% respectively.

Attention of the Ministry of Education has been drawn on the deserting of schools by boys before grade 10 especially.

It is expected that the education opportunities given by the project to develop 1000 secondary schools will provide a solution to this issue.

9.3.2 Participation of students in G.C.E. (A/L)

According to the level of performance of the G.C.E. (O/L) examination 60% of the students, approximately 175,000 students, annually get qualified to enter G.C.E. (A/L). Above chart shows that 22% choose science, 26% Commerce and 51% Arts out of the total. The Ministry of Education pioneer this programme to take steps to direct the student as for studying the science stream by changing the G.C.E. (A/L) subject selection.
The percentages of trained and graduate teachers in Sri Lanka aggregated to 95% in 2011 and it is one of the key indicators explaining the quality of education.

Programmes for training of untrained teachers are implemented continuously and as a result the country will be able to keep the percentage of qualified teachers at a rate of 100% in a near future.

Overall student teacher ratio is 18:1 and there is a graduate teacher for every 50 students and trained teacher for every 31 students.

At present, student percentage in G.C.E.(A/L) Science stream varies among districts from 13.9% to 29.9%. As well, the number of G.C.E.(A/L) science students per school varies from 47 to 221 among districts. These data shows the requirement of reducing the inequalities of science education by providing the schools island wide G.C.E.(A/L) laboratories and Science teachers in equitable manner.

Steps were already taken to provide science education facilities to the students all over the island through Mahindadoya technological laboratories established in 1000 secondary schools. School based teacher recruitment process has already been implemented in order to reduce inequalities in teacher supply.

### Table 9.4.1: Student Teacher Ratio

<table>
<thead>
<tr>
<th></th>

</tbody>
</table>

The percentages of trained and graduate teachers in Sri Lanka aggregated to 95% in 2011 and it is one of the key indicators explaining the quality of education.

Programmes for training of untrained teachers are implemented continuously and as a result the country will be able to keep the percentage of qualified teachers at a rate of 100% in a near future.
9.5 Improvements in Student Performance

9.5.1. Student performance at primary level measured through the results of Grade 5 scholarship examination

Actions have been taken to issue a certificate to the students who obtain over 70 marks at the grade 5 scholarship examination with a view to prevent the examination being only a competitive examination which provides the basis for selection of students for scholarships and popular schools. Overall, primary education is being developed through providing necessary financial and physical facilities to the schools. As a result student achievement levels has increased in 2012 with compared to 2008.

9.5.2 Student performance at the G.C.E.(O/L) examination

G.C.E.(O/L) results of past five years show that the percentage of students who qualified for the G.C.E.(A/L) based on the results of the G.C.E.(O/L) examination has increased during the period of 2010-2011 with compared to the previous years. Accordingly, students’ performance in Mathematics, Science and English at the G.C.E.(O/L) examination has also increased.

Department of Examinations has taken actions to distribute results analysis of all national examinations among the responsible agencies at national, provincial, zonal and school level and as a result, all responsible agencies have taken steps to implement various programmes to improve the results. Rehearsal tests, distribution of past papers, seminars for students, learning opportunities through media are some of the measures taken to improve the student performance.

(Data Source: Department of Examinations, Sri Lanka)
9.5.3 Student performance at G.C.E.(A/L) examination

Charts 9.5.4 and 9.5.5 show the percentages of students become eligible for admission to universities from the G.C.E. (A/L) examination according to the subject streams. Accordingly 50% of Science students and 70% of Arts students out of the total students sat for the examination in the first or second attempt in 2011 and 2012 were eligible to enter the university. It is significant that more than 70% of the students appeared for the examination in the Commerce stream were eligible for university entrance in 2012.

Through improved education approaches such as Mahindodaya Technological Laboratories linked with the 1000 Secondary schools programmes, steps have been taken to improve the Science and Commerce education move, diversification of the Arts subject stream and introduce a Technology subject stream and it is expected that the student performance level will be further improved by the steps taken.

(Data source: Department of Examinations)
### 9.6 Achievements in International Science and Mathematics Olympiad Competitions

#### Table 9.6.1: Achievements in 2011 and 2012

<table>
<thead>

</tr>
</tbody>
</table>

Selection and training of students to be present in the International Science Mathematics Olympiad Tournaments is performed according to a formal programme. Talented students in the remote areas have been given opportunity to participate and improve skills this way. It is significant that more victories could be gained in 2012 with compared to 2011.
