

Guideline Manual for Project Connect App Installation

Note: Install the application only on a **Desktop** or **Smart Board** device permanently located in the school

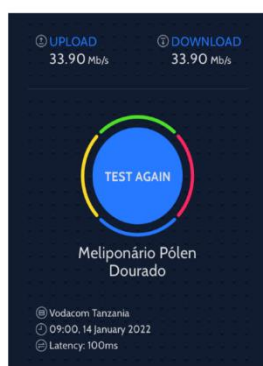

View the GIGA Map – Sri Lanka: <https://maps.giga.global/map/country/lk>

Step-by-step guide:

1. Download the Daily Check App exe file.

Download Link : <https://projectconnect.unicef.org/daily-check-app>

- a. Click on the download icon found in the below link to save the executable file into your computer:

Project Connect Daily Check Application

Help your school get better connectivity. Share your school's internet status with Project Connect every day.

Checks school internet connection

Every day, Daily Check automatically performs a short test using minimal data, to determine the quality and speed of your school's network.

Uploads results to public database

The results are uploaded to Project Connect's Open Data platform to provide an accurate picture of your school's location and network quality over time.

Provides key information to stakeholders

This information helps government and organisations focus resources to improve your school's internet connection.

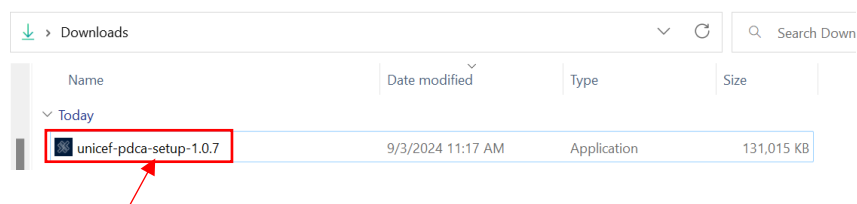

123MB, Windows OS only

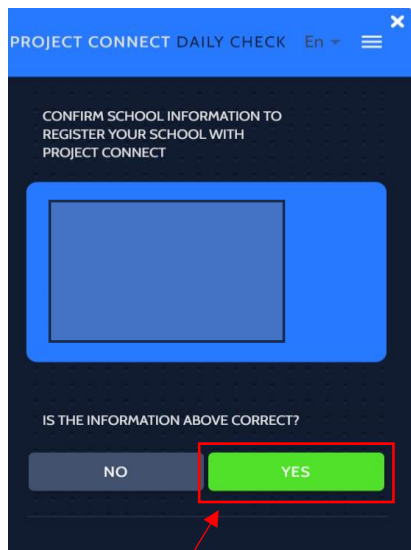

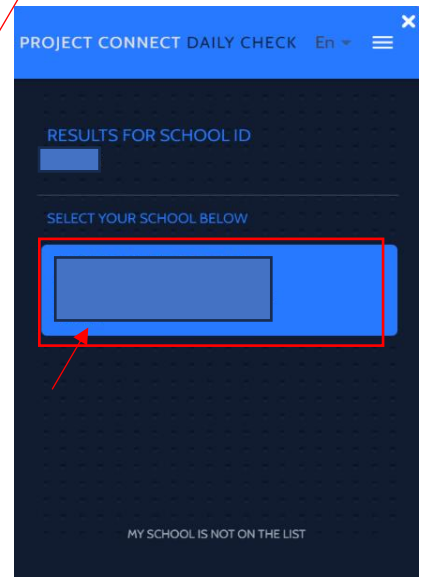

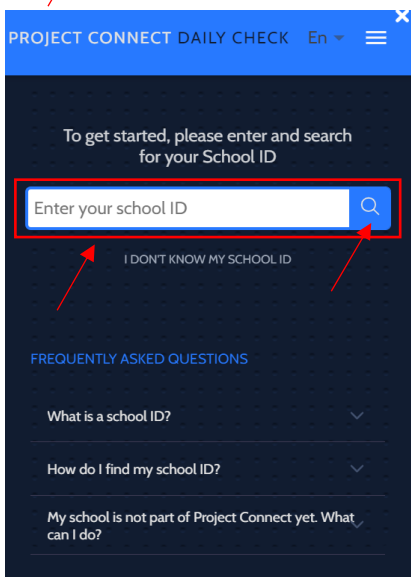

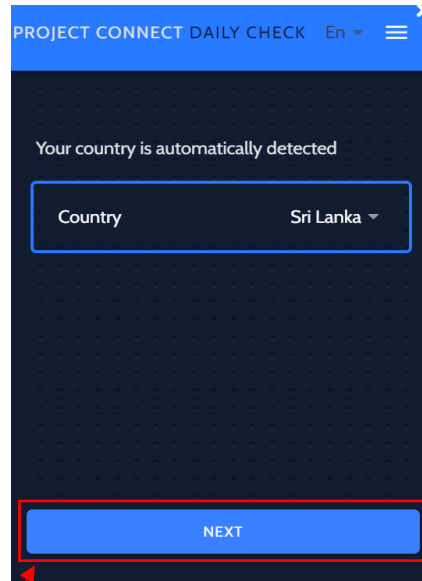

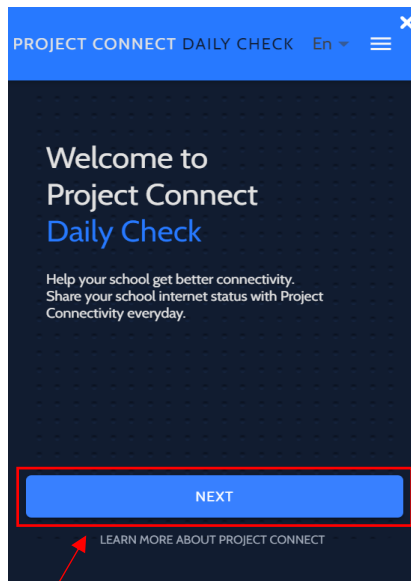

2. Run the downloaded exe file.

- a. Once the download is completed **double click** to open it and click **"Next"** then click **"Install"** to begin the installation process.

Note: In some cases, if antivirus software is installed on your computer, it may change the extension of the downloaded file. If this happens, **rename the file back to .exe and double-click to run it.**

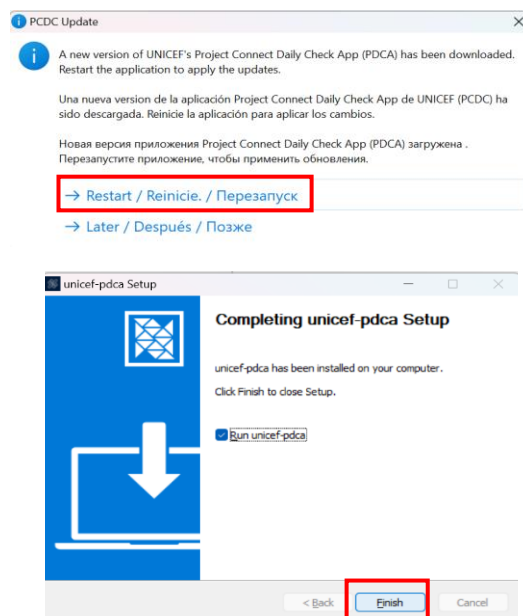

3. Open the installed application and enter your school **Census No** under School ID to get started.

Important:

- Install the application only on a **Desktop** or **Smart Board** device permanently located in the school
- **Do not** install it on laptops or smartphones.
- If the device where the application is installed is replaced or formatted, **reinstall** the application on the upgraded device.
- The application will **frequently update automatically**. When you receive a notification through a popup box, make sure to restart the device and continue the update.

Minimum Requirements:

- A School Internet connection
- Installed operating system of Windows 7 or higher with 500 Mb of free disk space

Further support:

- Census ID: You can obtain this information from your school administration
- For further assistance, please reach out to your Zonal office IT support team.
